《BPG》 Scientific editor work list

Manuscript No. 14517 **Scientific editor**: Qi Y **Column:** Case Report **Date:** December 3, 2014

No.	Responsibilities of scientific editors are to carefully check spelling and grammatical errors, wording errors, the suitability of tables, figures, figure data and legends, and symbols in tables (e.g., +, -, ×, ÷, %), and to confirm whether authors revised the manuscript according to the reviewers' comments.	**Comments**
1	Fixed headings must be copied.	√YES ☐NO
2	Title should concisely summarize the main topic of the study and is not too long (no more than 12 words). The use of words such as exploration, research, analysis, observation, and investigation should be avoided. Title should not start with 'The' or Arabic numbers and dose not use uncommon abbreviations.	√YES ☐NO
3	For the convenience of readers, a running title must be provided.	√YES ☐NO
4	The authors' full and abbreviated names in the manuscript should be consistent with those in the signed BPG Copyright Assignment sheet. All authors must sign the BPG Copyright Assignment sheet. Academic misconduct should be detected before the manuscript is sent to the Editor-in-Chief.	√YES ☐NO
5	Authors and their affiliations should be correct and consistent with those in the signed BPG Copyright Assignment sheet.	√YES ☐NO
6	'Supported by' must be copied to describe the source(s) of financial support, and spelling errors should be checked.	☐YES ☐NO
7	'Author contributions' must be copied to describe the contributions of each author. The format is as follows: Wang CL and Liang L contributed equally to this work; Wang CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed research; Wang CL, Zou CC, Hong F and Wu XM performed research; Xue Jz and Lu JR contributed new reagents/analytic tools; Wang CL, Liang L and Fu JF analyzed data; and Wang CL, Liang L and Fu JF wrote the paper.	√YES ☐NO
8	'Correspondence to' must be copied to describe the title, affiliation, address, and E-mail (all lowercase) of the corresponding author, and spelling errors should be checked.	√YES ☐NO
9	'Telephone' and 'Fax' must be copied to give the telephone and fax numbers of the corresponding author, and spelling errors should be checked. Telephone number should be composed of the country code, the area or city code, and phone number (e.g., +86-10-85381892).	√YES ☐NO
10	'Received:', 'Revised:', 'Accepted:' and 'Published online:' must be copied to describe the date when the manuscript is received, revised, accepted and published online, and spelling errors should be checked.	√YES ☐NO
11	'Abstract (AIM:, METHODS:, RESULTS, CONCLUSION:)' must be copied. Articles published in columns of Commentary, Frontier, Review, Topic Highlight, Observation, Guidelines for Basic Research, Guidelines for Clinical Practice, Field of Vision, Case Report and Letters to the Editor require a non-structured abstract that should be no less than 200 words (no less than 150 words for those published in Field of Vision, Case Report and Letters to the Editor). Original articles require a structured abstract consisting of AIM (no more than 20 words), METHODS (no less than 140 words), RESULTS (no less than 150 words), and CONCLUSION (no more than 26 words). Brief articles require a structured abstract consisting of AIM (no more than 20 words), METHODS (no less than 80 words), RESULTS (no less than 120 words), and CONCLUSION (no more than 26 words).	√YES ☐NO
12	'Key words' must be copied to list 5-10 key words for each paper. The first letter of each keyword should be capitalized, and each key word is separated by a semicolon. Key words should reflect the main content of the study.	☐YES ☐NO
13	The authors' abbreviated names in bibliography information should be consistent with those in the Title page and the signed BPG Copyright Assignment sheet.	☐YES ☐NO
14	'INTRODUCTION' must be copied to clearly describe the research background. Only the most relevant literature should be cited. Technical terms or abbreviations should be explained or defined, and the full name of abbreviations should be given (with abbreviations in parentheses) when they first appear in the text. 'I' and 'we' should be appropriately used to clearly indicate the work performed by the author(s). When weaknesses of previous studies are described to highlight the innovations in the current study, it should be careful.	√YES ☐NO
15	'MATERIALS AND METHODS' must be copied to clearly and accurately describe the materials and methods used in original articles or brief articles.	☐YES ☐NO
16	'RESULTS' must be copied to concisely describe the observatory and experimental results. Representative data and data that have scientific significance should be stressed. Data can be presented in the text, in a table, or as a chart, diagram or graph. Text should not simply duplicate the information in tables and figures, but should describe their trends, meaning, and inferences. Text should be accurate, concise and clear.	☐YES ☐NO
17	The numbers and order of tables, graphs, and images should be consistent with those in the text. Symbols in tables (e.g., +, -, ×, ÷) should be correct. Only one legend is required for color	√YES ☐NO

	graphs, black and white graphs, and line graphs that have the same theme. For example: Figure 1 Pathological changes in atrophic gastritis tissue before and after treatment. A: ⋯; B: ⋯; C: ⋯; D: ⋯; E: ⋯; F: ⋯.	
18	Split pictures include flow charts, line graphs, histograms, and graphs including text. Unsplit pictures include meta-analysis diagrams, PCR amplification curves, and survival curves.	√YES ☐NO
19	Statistical symbols: Statistical significance should be expressed as $^{a}P<0.05$, $^{b}P<0.01$ ($P>0.05$ usually does not need to be marked). If there are other series of P values, $^{c}P<0.05$ and $^{d}P<0.01$ are used. A third series of P values can be expressed as $^{e}P<0.05$ and $^{f}P<0.01$. Statistical data should be expressed as mean ± SD or mean ± SE.	√YES ☐NO
20	'DISCUSSION' must be copied to (1) describe the main purpose and hypothesis, (2) summarize the most important results, (3) illustrate and explain the results and draw conclusions or inferences based on the results, (4) point out the limitations of the study and their impact on results, and propose further advice on research topic or direction, and (5) describe the theoretical significance and practical value of the findings.	√YES ☐NO
21	'ACKNOWLEDGMENTS' must be copied to express gratitude to any individuals or organizations for their technical support, including providing instruments, equipment or experimental materials, assistance in experimental work, providing useful inspiration, suggestions, guidance, or review, and performing some auxiliary work.	√YES ☐NO
22	'COMMENTS' must be copied to write comments for original articles and brief articles in accordance with the specified format. 'Science News' must be written for original articles in accordance with the specified format.	√YES ☐NO
23	'REFERENCES' must be copied to list the references in the Vancouver style. This style uses Arabic numeric in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following "Pang et al". For citations where no author is indicated, a superscript number should be placed at the end of the sentence. For example, Ma [1] reported ....., Pan et al [2-5] believed .....; PCR has a high sensitivity [6,9]. Do not use superscript numbers when the reference number is described in the text (e.g., the experimental method used has been described in reference [8]). The style of reference citations in tables is the same as that in the text (e.g., Pan et al [2-5], please see reference [8]).	√YES ☐NO
24	Journal references must undergo testing to ensure that there are no duplicate references and that PMID numbers are correct. For references not yet included in PubMed, the name of Chinese journals should be spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi), and journals in other languages should be listed according to indexing information retrieved from Google. Book references must provide all the information of the electronic version.	√YES ☐NO
25	The names of peer reviewers and scientific editor should be added at the end of the paper (e.g., P-Reviewer Huge D S-Editor Wang JL)	√YES ☐NO
26	The number of cited references should be no less than 50 for commentary articles, no less than 100 for reviews, no less than 36 for original articles, no less than 26 for brief articles, and no less than 1 for case reports and letters to the editor.	√YES ☐NO
27	Language certificate provided by non-native speakers of English should be named ESPS manuscript No. -Language certificate (e.g., 870- Language certificate). Response letters should be named ESPS manuscript No.-Answering reviewers (e.g., 870-Answering reviewers). Revised manuscripts should be named ESPS manuscript No.-Review (e.g., 870- Review). Letter of peer-reviewers' comments should be named ESPS manuscript No.-Peer review(s) (e.g., 870-Peer review(s)). Copyright assignment file should be named ESPS manuscript No.-Copyright assignment (e.g., 870-Copyright assignment). Agreement for Use of Personal Photos file should be named ESPS manuscript No.-Agreement for use of personal photos (e.g., 870- Agreement for use of personal photos).	√YES ☐NO
28	Did the author(s) highlight the changes made to the manuscript according to the peer-reviewers' comments?	√YES ☐NO
29	Are the responses to the peer-reviewers' comments consistent with the changes made to the manuscript?	√YES ☐NO
30	Did all authors sign the BPG Copyright Assignment sheet?	√YES ☐NO
31	Does language certificate provided by non-native speakers of English meet our requirements?	√YES ☐NO
32	Are the Photos licensed in the Agreement for Use of Personal Photos consistent with those in the paper?	√YES ☐NO
38	Scientific editor work list should be named ESPS manuscript No.-Scientific editor work list (e.g., 870-Scientific editor work list).	√YES ☐NO
39	CrossCheck is an effective tool for detecting unoriginal content, enabling our editors to preserve the journal's integrity and the authors' copyright. For accepted manuscripts, we will conduct CrossCheck(http://www.ithenticate.com/) detection. The document should contain "Name of journal", "ESPS Manuscript No.", "Columns", "Title" and "Author list" of the manuscript. The Figure of the CrossCheck should be JPEG format (.jpg), and 1440 × 680 Pixel.	√YES ☐NO

40	The text should be typed in 1.5 space in Book Antiqua font of 12 pt.		√YES □NO
	Publication process	Manuscript reception and registration→Initial review by scientific editor→Peer review→End of peer review→First round of meeting evaluation→To be accepted→Revision by the author(s)→Second round of meeting evaluation→To be accepted/revised/rejected→Final review by the Editor-in-Chief（final quality control of the academic content and language quality）→Final acceptance and charging a publication fee→Language editing→Production→Proofread by scientific editor→Proofread by deputy editor → Final review by Editor-in-Chief→Release of online open-access papers in electronic form on BPG website→Release of online papers on PubMed Central→Sending high-quality PDF reprints to the author(s)→End of the publication process	63.75 RMB/article
