Item No.	Specific items for verification	Yes=[Y]
		No= [N]
	General Information of the Manuscript	
	Name of journal: World Journal of Gastroenterology	
	Manuscript NO.: 67143	
	Column: Retrospective Study	
	Title: Diagnosis of focal liver lesions with deep learning-based	
	multi-channel analysis of hepatocyte-specific contrast-enhanced	
1	magnetic resonance imaging	
1	Authors: Róbert Stollmayer, Bettina K Budai, Ambrus Tóth, Ildikó	[Y]
	Kalina, Erika Hartmann, Péter Szoldán, Viktor Bérczi, Pál	
	Maurovich-Horvat and Pál N Kaposi	
	Reviewer code: 03003255	
	First decision: 2021-06-23 01:45	
	Scientific Editor: Jia-Ru Fan	
	Date of signature: <u>August 23, 2021</u> (month/day/year)	
2	Editorial Office's Comments	
	Science Editor: 1 Scientific quality This is an original article	
	regarding the diagnosis of focal liver lesions with deep	[Y]
	learning-based multi-channel analysis. The topic is within the scope	
	of the journal. Classification: Grade B and A; Summarization of	

Baishideng Publishing

7041 Koll Center Parkway, Suite 160, Pleasanton, CA 94566, USA **Telephone:** +1-925-399-1568 E-mail: bpgoffice@wjgnet.com https://www.wjgnet.com

the Peer-Review Report: According Both 2D and 3D-DenseNets can differentiate FNH, HCC and MET with good accuracy when trained on hepatocyte-specific contrast-enhanced multi-sequence MRI volumes. Format: There are 5 figures (good quality) and 2 tables. References: References are representative of the text. Language evaluation The authors provided a certificate and consequently english-language is acceptable Academic norms and rules Approval of the study is report but an English-language document is needed There is no misconduct The biostatistician's certificate has been reported The informed signed consent is not clear Supplementary comments Invited Manuscript; No funding Issues raised The STROBE checklist must be added and proper reference added in the text. Discussion should be shortened (at least ¹/₂) and results section improved. 6 Re-Review A re-review of the manuscript is required. 7 Recommendation The study can be improved by responding to comments and I strongly suggest a further round of review Company Editor-in-Chief: I have reviewed the Peer-Review Report, full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Gastroenterology, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s)

for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors.

3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	
	not too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided.	[Y]
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first	
6	names are listed on the title page and are consistent with those	[Y]
	listed in the signed BPG Copyright License Agreement form.	
	The 'Author contributions' passage describes the specific	
	contribution(s) made by each author. The author's names are listed	
	in the following format: full family (sur)name followed by	
	abbreviated first and middles names.	
	e.g., "Wang CL and Liang L contributed equally to this work; Wang	
7	CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	[Y]
	research study; Wang CL, Zou CC, Hong F and Wu XM performed	
	the research; Xue JZ and Lu JR contributed new reagents and	
	analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and	
	Wang CL, Liang L and Fu JF wrote the manuscript. All authors	
	have read and approve the final manuscript."	
	The 'Supported by' statement describes the source(s) of financial	
8	support and includes the corresponding identification number(s)	[N]
	and program ID(s) if available, and contains no spelling errors.	
	The 'Corresponding author' passage provides the corresponding	
	author's full first and family (sur)names, abbreviated title (e.g., MD,	
9	PhD), affiliated institute's name and complete postal address	[Y]
	(including zip code) and e-mail (written in all lowercase), and	
	contains no spelling errors.	

10	The Manuscript Tracking information (<i>i.e.</i> , Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors.	[Y]
11	The Abstract section is formatted according to the article-specific style (structured vs unstructured) and word count thresholds, as follows: Commentary, Frontier, Diagnostic Advances, Medical Ethics, Minireview, Review, Therapeutics Advances, and Topic Highlight: Non-structured abstract that is no less than 200 words. Field of Vision, Case Report and Letter to the Editor: Non-structured abstract that is no less than 150 words. Research articles: Structured abstract with subsections for AIM (no more than 20 words); METHODS (no less than 80 words); RESULTS (no less than 120 words); and CONCLUSION (no more than 26 words).	[Y]
12	The 'Key words' list provides 5-10 keywords that reflect the main content of the study. The first letter of each keyword is capitalized, and each keyword is separated by a semicolon.	[Y]
13	The "citation" contains authors' names and manuscript title. The name of the first author should be typed in bold letters; the family (sur) name of all authors should be typed with the first letter capitalized, followed by their abbreviated first and middle initials. For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM, Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes mellitus increases the risk of gastric cancer: A meta-analysis. <i>World J</i> <i>Gastroenterol</i> 2019; In press	[Y]
14	The 'Core tip' provides a summary (less than 100 words) of the study that outlines the most innovative and important arguments	[Y]

	and core contents of the paper and will serve to effectively attract	
	readers.	
	The 'INTRODUCTION' section clearly describes the relevant	
	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or defined,	
15	with the full name of abbreviations given upon first appearance in	[N/]
15	the text and the abbreviation presented in parentheses [i.e.,	[Y]
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed	
	by the author(s). When weaknesses of previous studies are	
	described in the text to highlight the innovations related to the	
	current study, the information is presented carefully.	
	The 'MATERIALS AND METHODS' section clearly and accurately	
10	describes all materials and methods used to obtain the data	D/1
16	presented in the article and is adequate for a reader to repeat the	[Y]
	study.	
	The 'RESULTS' section concisely describes the observational and	
	experimental results. Representative data and data that have	
	scientific significance are emphasized. Data is presented in either	
17	the text, a table or figure (<i>i.e.</i> , chart, diagram, graph or image), but is	[Y]
	not repeated among each. Information presented in the tables and	
	figures clearly describes the trends, meaning, and inferences.	
	Results described in textual form are accurate, concise and clear.	
18	Statistical symbols are accurate. Statistical significance is expressed	
	as ${}^{a}P < 0.05$, ${}^{b}P < 0.01$ ($P > 0.05$ usually does not need to be denoted).	
	If there are other series of <i>P</i> values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,	[Y]
	and a third series of <i>P</i> values is expressed as ${}^{e}P < 0.05$ and ${}^{f}P < 0.01$.	
	Statistical data is expressed as mean \pm SD or mean \pm SE.	

19The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.[M]20The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (<i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (<i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.[M]21The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.[M]22The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text, a superscript number should be placed following the name (<i>i.e.</i> , "Pang et al"). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Mall'i reported,", "Pan et al ^[0,5] . "The style of reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text (e.g., Pan et al ^[0,5] , please see reference [8]).			
 (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings. The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (<i>i.e.</i>, providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (<i>i.e.</i>, useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work. The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format. The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text, For citations where the author's name is indicated, a superscript number should be placed following the name (<i>i.e.</i>, "Pag et al"). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma^[0] (Y] reported,", "Pan et al^[24] indicated"; "PCR has a high sensitivity^[64]." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text 		The 'DISCUSSION' section (1) describes the main purpose and	
19the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.[Y]20The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (<i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (<i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.[Y]21The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.[Y]21The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text, a superscript number should be placed following the name (<i>i.e.</i> , "Pang <i>et al</i> "). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma ^[1] [Y]22the placed at the end of the sentence. Respective examples are: "Ma ^[1] [Y]reported", "Pan <i>et al</i> ^[2,5] indicated"; "PCR has a high sensitivity ^[6,9] ." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text		where the author's name is indicated in the text, a superscript	
be placed at the end of the sentence. Respective examples are: "Ma ^[1] [Y] reported", "Pan <i>et al</i> ^[2-5] indicated"; "PCR has a high sensitivity ^[6,9] ." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text		number should be placed following the name (<i>i.e.</i> , "Pang <i>et al</i> "). For	
reported", "Pan <i>et al</i> ^[2-5] indicated"; "PCR has a high sensitivity ^[6,9] ." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text		citations where no author is indicated, a superscript number should	
sensitivity ^[6,9] ." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text	22	be placed at the end of the sentence. Respective examples are: "Ma ^[1]	[Y]
reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text		reported", "Pan et al ^[2-5] indicated"; "PCR has a high	
experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text		sensitivity ^[6,9] ." No superscript numbers are used when the	
style of reference citations in tables is the same as that in the text		reference number is described in the text; for example, "The	
		experimental method used has been described in reference [8]." The	
(e.g., Pan et $al^{[2-5]}$, please see reference [8]).		style of reference citations in tables is the same as that in the text	
		(e.g., Pan et al ^[2-5] , please see reference [8]).	

	Journal references have been verified to ensure that there are no	
	duplicate references and that the PMID numbers are correct. For	
	references not yet included in PubMed: the name of Chinese	
22	journals is spelled out using Chinese Pinyin, with the first letter of	[1/]
23	each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of	[Y]
	journals in other languages are listed according to indexing	
	information retrieved from Google. Book references are presented	
	with all the information relevant to the electronic version.	
	The number of cited references is appropriate for the article type, as	
	follows:	
24	<u>Commentary:</u> no less than 50;	D.4
24	<u>Review:</u> no less than 100;	[Y]
	<u>Article:</u> no less than 30/26;	
	Case Report and Letter to the Editor: no less than 1.	
	The ethics-related statements are provided in accordance with the	
25	manuscript type (e.g., Manuscript NoInstitutional review board	[Y]
	statement, Manuscript NoAnimal care and use statement, etc.).	
	The names of the peer reviewers and the scientific editor are present	
26	at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang	[Y]
	JL).	
	The order and numerical labeling of tables and figures is consistent	
	with their appearance and presentation in the text. Symbols in	
27	tables (e.g., +, -, \times , \div , *) correctly correspond to the definitions in the	
	footnotes. Only one legend is provided for each multi-panel figure	[Y]
	consisting of color graphs, black and white graphs, or line graphs	[±]
	that depicts data of the same theme. For example: Figure 1	
	Pathological changes in atrophic gastritis tissue before and after	
	treatment. A:; B:; C:; D:; E:; F:	
28	Split pictures include flow charts, line graphs, histograms, and	[Y]
20	graphs including text. Unsplit pictures include meta-analysis	[*]

	diagrama DCD amplification surray and surrivel surray	
	diagrams, PCR amplification curves, and survival curves.	
29	The author(s) highlighted the changes made to the manuscript	[Y]
	according to the peer-reviewers' comments.	
30	The responses to the peer-reviewers' comments are consistent with	[Y]
	the changes made to the manuscript.	[+]
	The revised manuscript is provided (file name: Manuscript	
	NoReview; e.g., 870- Review).	
01	The letter of peer-reviewers' comments is provided (file name:	[X/]
31	Manuscript NoPeer-review(s); e.g., 870-Peer-review(s)).	[Y]
	The response letter is provided (file name: Manuscript	
	NoAnswering reviewers; <i>e.g.</i> , 870-Answering reviewers).	
	The related ethics and relevant documents are provided, such as (1)	
	Approved grant application form(s) or funding agency copy of any	
	approval document(s) (file name: Manuscript NoGrant application	
	form(s)); (2) Biostatistics review certificate (file name: Manuscript	
	NoBiostatistics statement); (3) Conflict-of-interest statement (file	
	name: Manuscript NoConflict-of-interest statement); (4) Clinical	
	trial registration statement (file name: Manuscript NoClinical trial	
32	registration statement); (5) Institutional review board approval form	[Y]
	or document (file name: Manuscript NoInstitutional review board	
	statement); (6) Institutional animal care and use committee	
	approval form or document (file name: Manuscript	
	NoInstitutional animal care and use committee statement), and (7)	
	Signed informed consent form(s) or document(s) (file name:	
	Manuscript NoInformed consent statement).	
33	All authors signed the BPG Copyright license agreement form (file	
	name: Manuscript NoCopyright license agreement; <i>e.g.</i> ,	[Y]
	870-Copyright license agreement).	[*]
34	The language certificate provided by authors who are non-native	
		[Y]
	speakers of English meets the BPG requirements (file name:	

]
	Manuscript NoLanguage certificate; <i>e.g.</i> , 870-Language certificate).	
35	The photos licensed in the Agreement for Use of Personal Photos are consistent with those in the paper (file name: Manuscript NoAgreement for use of personal photos; <i>e.g.</i> , 870-Agreement for use of personal photos).	[N]
36	This document (Checklist of Responsibilities for Scientific Editors) has been saved under the file name: manuscript NoScientific editor work list (<i>e.g.</i> , 870-Scientific editor work list).	[Y]
37	A <i>CrossCheck</i> investigation (an effective tool for detecting unoriginal content, enabling our editors to preserve the journal's integrity and the authors' copyright) has been performed for the manuscript <i>via</i> the website: http://www.ithenticate.com/. The results document contains the following information for the manuscript: "Name of journal", "Manuscript No.", "Columns", "Title" and "Author list". The Figure of the <i>CrossCheck</i> results is saved in JPEG format (.jpg) at 1440 × 680 pixel resolution. The PDF of the <i>CrossCheck</i> results has been saved under the file name: manuscript No CrossCheck report (<i>e.g.</i> , 870-CrossCheck report). The Google searches have also been performed to further ensure publication of original content.	[Y]
38	The text of the manuscript is typed in Book Antiqua font, 12 pt, with 1.5 line spacing.	[Y]
Responsibilities of scientific editors	grammar, punctuation and wording; (2) suitability of tables, figures, figure data and ientific legends; (3) accurate and appropriate presentation of symbols (<i>e.g.</i> +, -, \times , \div , $\%$, *) in
