the WJG. (1) Classification: Grade A and Grade B; (2) Summary of the Peer-Review Report: This study is excellent, and the results can bring some new sight to clinicians for the treatment of acute pancreatitis. The questions raised by the reviewers should be answered; (3) Format: There are 6 tables and 1 figure; (4) References: A total of 49 references are cited, including 12 references published in the last 3 years; (5) Self-cited references: There are 3 self-cited references. The self-referencing rates should be less than 10%. Please keep the reasonable self-citations (i.e. those that are most closely related to the topic of the manuscript) and remove all other improper self-citations. If the authors fail to address the critical issue of self-citation, the editing process of this manuscript will be terminated; and (6) References recommendations: The authors have the right to refuse to cite improper references recommended by the peer reviewer(s), especially references published by the peer reviewer(s) him/herself (themselves). If the authors find the peer reviewer(s) request for the authors to cite improper references published by him/herself (themselves), please send the peer reviewer's ID number to editorialoffice@wjgnet.com. The Editorial Office will close and remove the peer reviewer from the F6Publishing system immediately. 2 Language evaluation: Classification: Two Grades B. A language editing certificate issued by MedSci was provided. 3 Academic norms and rules: The authors provided the Biostatistics Review Certificate, the Institutional Review Board Approval Form. |     | The 'INTRODUCTION' section clearly describes the relevant                                   |      |
|     | background information for the study. Only the most relevant and                            |      |
|     | current (within the past 5 years) literature is cited, with the                             |      |
|     | exception of rare instances of seminal literature citations. All                            |      |
|     | technical terms and/or abbreviations are explained and/or defined,                          |      |
| 4.5 | with the full name of abbreviations given upon first appearance in                          |      |
| 15  | the text and the abbreviation presented in parentheses [i.e.,                               | [Y]  |
|     | "computed tomography (CT)"]. First-person pronouns (e.g., 'I',                              |      |
|     | 'we') are used appropriately to clearly indicate the work performed                         |      |
|     | by the author(s). When weaknesses of previous studies are                                   |      |
|     | described in the text to highlight the innovations related to the                           |      |
|     | current study, the information is presented carefully.                                      |      |
|     | The 'MATERIALS AND METHODS' section clearly and accurately                                  |      |
| 16  | describes all materials and methods used to obtain the data                                 | F2/1 |
| 16  | presented in the article and is adequate for a reader to repeat the                         | [Y]  |
|     | study.  |      |
|     | The 'RESULTS' section concisely describes the observational and                             |      |
|     | experimental results. Representative data and data that have                                |      |
|     | scientific significance are emphasized. Data is presented in either                         |      |
| 17  | the text, a table or figure (i.e., chart, diagram, graph or image), but is                  | [Y]  |
|     | not repeated among each. Information presented in the tables and                            |      |
|     | figures clearly describes the trends, meaning, and inferences.                              |      |
|     | Results described in textual form are accurate, concise and clear.                          |      |
| 18  | Statistical symbols are accurate. Statistical significance is expressed                     |      |
|     | as ${}^{a}P$ < 0.05, ${}^{b}P$ < 0.01 ( $P$ > 0.05 usually does not need to be denoted).    |      |
|     | If there are other series of $P$ values, $^cP$ < 0.05 and $^dP$ < 0.01 are used,            | [Y]  |
|     | and a third series of $P$ values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01. |      |
|     | Statistical data is expressed as mean ± SD or mean ± SE.                                    |      |
