Similar sentences with other articles (highlighted in the CrossCheck Report), please rephrase these sentences. Our editorial policy states the overall similarity should be less than 30%, the overlapped section should be less than 5% in single papers, including author's own work. Please modify on the basis of the attached manuscript.

Company Editor-in-Chief: I have reviewed the Peer-Review Report, the full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Gastroenterology, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors. Before final acceptance, uniform presentation should be used for figures showing the same or similar contents; for example, "Figure 1Pathological changes of atrophic gastritis after treatment. A: ...; B: ...; C: ...; D: ...; E: ...; F: ...; G: ...". Please provide decomposable Figures (in which all components are movable

Min Park will be written as Yoon JM, Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes mellitus increases the risk of gastric cancer: A meta-analysis. World J Gastroenterol 2019; In press  The 'Core tip' provides a summary (less than 100 words) of the study that outlines the most innovative and important arguments and core contents of the paper and will serve to effectively attract readers.  The 'INTRODUCTION' section clearly describes the relevant background information for the study. Only the most relevant and current (within the past 5 years) literature is cited, with the exception of rare instances of seminal literature citations. All technical terms and/or abbreviations are explained and/or defined, with the full name of abbreviation presented in parentheses [i.e., "computed tomography (CT)"]. First-person pronouns (e.g., "T, 'we') are used appropriately to clearly indicate the work performed by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the current study, the information is presented carefully.  The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.  The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure (i.e., chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly

	The 'DISCUSSION' section (1) describes the main purpose and	
	hypothesis of the study; (2) summarizes the most important results; (3)	
	illustrates and explains the results (but does not simply repeat the data)	
19	and draws conclusions or inferences based on the results; (4) points out	[Y]
	the limitations of the study and their impact on the results, as well as	
	proposes further advice on future research topic(s) or direction(s); and	
	(5) describes the theoretical significance and practical value of the	
	findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	
	individuals or organizations for technical support (i.e., providing	
20	instrumentation, equipment or experimental materials, and/or	D.C.
20	assistance in experimental work), non-technical services (i.e., useful	[Y]

	auxiliary work.	
04	The 'ARTICLE HIGHLIGHTS' section provides comments for original	5
21	articles in accordance with the specified format.	[N]
	The 'REFERENCES' section lists the references in the Vancouver style.	
22	This style uses Arabic numeral in-text citations based on the order of the	
	first appearance of a source in the text. For citations where the author's	[Y]
	name is indicated in the text, a superscript number should be placed	
	following the name (i.e, "Pang et al"). For citations where no author is	
	indicated, a superscript number should be placed at the end of the	
	sentence. Respective examples are: "Ma <sup>[1]</sup> reported", "Pan et al <sup>[2-5]</sup>	
	indicated"; "PCR has a high sensitivity <sup>[6,9]</sup> ." No superscript numbers	
	are used when the reference number is described in the text; for	
	example, "The experimental method used has been described in	
	reference [8]." The style of reference citations in tables is the same as that	
	in the text (e.g., Pan et al $^{[2-5]}$ , please see reference [8]).

	Journal references have been verified to ensure that there are no
