

## CHECKLIST OF RESPONSIBILITIES FOR SCIENTIFIC EDITORS

Manuscript page number: 26

Manuscript word count: 5199

		Comments
Item No.	Specific items for verification	Yes=[Y]
		No= [N]
	General Information of the Manuscript	
	Name of journal: World Journal of Diabetes	
	Manuscript NO.: 64353	
	Column: Observational Study	
	Title: Medication Adherence and quality of life among Type-2	
1	diabetes mellitus in India	[Y]
	Authors: Rakhi Mishra, Suresh Kumar Mishra and Ravi Kant	
	Reviewer code: 05126185	
	<b>First decision:</b> 2021-03-30 02:26	
	Scientific Editor: Man Liu	
	Date of signature: <u>7/15/2021</u> (month/day/year)	
	Editorial Office's Comments	
	Science Editor: 1 Scientific quality: The manuscript describes a basic	
2	study of the medication adherence and quality of life among Type-2	[Y ]
	diabetes mellitus in India. The topic is within the scope of the WJD.	
	(1) Classification: Grade C; (2) Summary of the Peer-Review Report:	
	This study is fine overall with a good topic, a popular approach,	
	significant results and appropriate conclutions. However, this study	
	still has one important limitation. The questions raised by the	

# Baishideng Baishideng Publishing

7041 Koll Center Parkway, Suite 160, Pleasanton, CA 94566, USA **Telephone:** +1-925-399-1568 E-mail: bpgoffice@wjgnet.com https://www.wjgnet.com

reviewer should be answered; and (3) Format: There are 3 tables. (4) References: A total of 27 references are cited, including 7 references published in the last 3 years; (5) Self-cited references: There are no self-cited references; and (6) References recommend: The authors have the right to refuse to cite improper references recommended by peer reviewer(s), especially the references published by the peer reviewer(s) themselves. If the authors found the peer reviewer(s) request the authors to cite improper references published by themselves, please send the peer reviewer's ID number to the editorialoffice@wjgnet.com. The Editorial Office will close and remove the peer reviewer from the F6Publishing system immediately. 2 Language evaluation: Classification: Grade B. 3 Academic norms and rules: The authors provided the The ARRIVE Guidelines and the Institutional Review Board Approval Form. No academic misconduct was found in the Bing search. 4 Supplementary comments: This is an unsolicited manuscript. No financial support was obtained for the study. The topic has not previously been published in the WJD. 5 Issues raised: (1) The "Author Contributions" section is missing. Please provide the author contributions; (2) PMID and DOI numbers are missing in the reference list. Please provide the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references. Please revise throughout; and (3) The "Article Highlights" section is missing. Please add the "Article Highlights" section at the end of the main text; 6 Recommendation:

	Conditional acceptance.	
	Company Editor-in-Chief: I have reviewed the Peer-Review	
	Report, full text of the manuscript, and the relevant ethics	
	documents, all of which have met the basic publishing requirements	
	of the World Journal of Diabetes, and the manuscript is	
	conditionally accepted. I have sent the manuscript to the author(s)	
	for its revision according to the Peer-Review Report, Editorial	
	Office's comments and the Criteria for Manuscript Revision by	
	Authors.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	
	not too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided.	[Y]
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first	
6	names are listed on the title page and are consistent with those	[Y]
	listed in the signed BPG Copyright License Agreement form.	
	The 'Author contributions' passage describes the specific	
	contribution(s) made by each author. The author's names are listed	
	in the following format: full family (sur)name followed by	
	abbreviated first and middles names.	
_	e.g., "Wang CL and Liang L contributed equally to this work; Wang	
7	CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	[ Y]
	research study; Wang CL, Zou CC, Hong F and Wu XM performed	
	the research; Xue JZ and Lu JR contributed new reagents and	
	analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and	
	Wang CL, Liang L and Fu JF wrote the manuscript. All authors	

	have read and approve the final manuscript."	
8	The 'Supported by' statement describes the source(s) of financial support and includes the corresponding identification number(s)	[N]
	and program ID(s) if available, and contains no spelling errors. The 'Corresponding author' passage provides the corresponding	
9	author's full first and family (sur)names, abbreviated title ( <i>e.g.</i> , MD, PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors.	[Y]
10	The Manuscript Tracking information ( <i>i.e.</i> , Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors.	[Y ]
11	The Abstract section is formatted according to the article-specific style (structured <i>vs</i> unstructured) and word count thresholds, as follows: <u>Commentary, Frontier, Diagnostic Advances, Medical Ethics,</u> <u>Minireview, Review, Therapeutics Advances, and Topic Highlight</u> : Non-structured abstract that is no less than 200 words. <u>Field of Vision, Case Report and Letter to the Editor</u> : Non-structured abstract that is no less than 150 words. <u>Research articles</u> : Structured abstract with subsections for AIM (no more than 20 words); METHODS (no less than 80 words); RESULTS	[ Y]

	words).	
12	The 'Key words' list provides 5-10 keywords that reflect the main	
	content of the study. The first letter of each keyword is capitalized,	[Y]
	and each keyword is separated by a semicolon.	
	The "citation" contains authors' names and manuscript title. The	
	name of the first author should be typed in bold letters; the family	
	(sur) name of all authors should be typed with the first letter	
	capitalized, followed by their abbreviated first and middle initials.	
13	For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick	[Y]
	Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,	
	Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes	
	mellitus increases the risk of gastric cancer: A meta-analysis. World J	
	Gastroenterol 2019; In press	
	The 'Core tip' provides a summary (less than 100 words) of the	
14	study that outlines the most innovative and important arguments	[Y]
14	and core contents of the paper and will serve to effectively attract	
	readers.	
	The 'INTRODUCTION' section clearly describes the relevant	
	background information for the study. Only the most relevant and	[ Y]
	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or defined,	
15	with the full name of abbreviations given upon first appearance in	
	the text and the abbreviation presented in parentheses [i.e.,	
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed	
	by the author(s). When weaknesses of previous studies are	
	described in the text to highlight the innovations related to the	
	current study, the information is presented carefully.	

16	The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.	[Y ]
	The 'RESULTS' section concisely describes the observational and	
	experimental results. Representative data and data that have	
	scientific significance are emphasized. Data is presented in either	
17	the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is	[ Y]
	not repeated among each. Information presented in the tables and	[ -]
	figures clearly describes the trends, meaning, and inferences.	
	Results described in textual form are accurate, concise and clear.	
	Statistical symbols are accurate. Statistical significance is expressed	
	as ${}^{a}P < 0.05$ , ${}^{b}P < 0.01$ ( $P > 0.05$ usually does not need to be denoted).	
18	If there are other series of <i>P</i> values, ${}^{c}P < 0.05$ and ${}^{d}P < 0.01$ are used,	[Y]
	and a third series of <i>P</i> values is expressed as ${}^{e}P < 0.05$ and ${}^{f}P < 0.01$ .	
	Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.	
	The 'DISCUSSION' section (1) describes the main purpose and	
	hypothesis of the study; (2) summarizes the most important results;	[Y]
	(3) illustrates and explains the results (but does not simply repeat	
19	the data) and draws conclusions or inferences based on the results;	
19	(4) points out the limitations of the study and their impact on the	
	results, as well as proposes further advice on future research	
	topic(s) or direction(s); and (5) describes the theoretical significance	
	and practical value of the findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	
	individuals or organizations for technical support (i.e., providing	[Y]
20	instrumentation, equipment or experimental materials, and/or	
	assistance in experimental work), non-technical services (i.e., useful	
	inspiration, suggestions, guidance, or review), and/or any other	
	auxiliary work.	

21       The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.       [Y]         21       The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name ( <i>i.e.</i> , "Pang et al"). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma <sup>[1]</sup> reported,", "Pan et al <sup>[2,5]</sup> indicated,"; "PCR has a high sensitivity <sup>[6,0]</sup> . No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text (e.g., Pan et al <sup>[2,5]</sup> , please see reference [8]).       [Y]         23       Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in other languages are listed according to indexing information relevant to the electronic version.       [Y]         24       Commentary: no less than 50;       [Y]       [Y]         24       Commentary: no less than 50;       [Y]         24       Commentary: no less than 50;       [Y]

24       The number of cited references is appropriate for the article type, as follows:         24       Commentary: no less than 50;         Review: no less than 100;       [Y]         Article: no less than 30/26;		information retrieved from Google. Book references are presented	
24     follows:       Commentary: no less than 50;       Review: no less than 100;       Article: no less than 30/26;		with all the information relevant to the electronic version.	
24 Commentary: no less than 50; <u>Review:</u> no less than 100; <u>Article:</u> no less than 30/26;		The number of cited references is appropriate for the article type, as	[Y]
$ \begin{array}{c}         24 \\         \underline{\text{Review: no less than 100;}} \\         \underline{\text{Article: no less than 30/26;}} \\     \end{array} $ $ \begin{array}{c}         \begin{bmatrix}             Y \\         \end{bmatrix} $	24	follows:	
<u>Review:</u> no less than 100; <u>Article:</u> no less than 30/26;		<u>Commentary:</u> no less than 50;	
		<u>Review:</u> no less than 100;	
Case Report and Letter to the Editor: no less than 1.		<u>Article:</u> no less than 30/26;	
		Case Report and Letter to the Editor: no less than 1.	

The ethics-related statements are provided in accordance	with the
25 manuscript type ( <i>e.g.</i> , Manuscript NoInstitutional review	w board [Y ]
statement, Manuscript NoAnimal care and use statement, e	etc.).
The names of the peer reviewers and the scientific editor are	e present
at the end of the paper ( <i>e.g.</i> , P-Reviewer: Hugot D S-Edito	r: Wang [Y]
JL).	
The order and numerical labeling of tables and figures is co	onsistent
with their appearance and presentation in the text. Syn	nbols in
tables (e.g., +, -, $\times$ , $\div$ , $\ast$ ) correctly correspond to the definition	ns in the
footnotes. Only one legend is provided for each multi-pane	el figure
27 consisting of color graphs, black and white graphs, or line	e graphs
that depicts data of the same theme. For example: F	igure 1
Pathological changes in atrophic gastritis tissue before a	nd after
treatment. A:; B:; C:; D:; E:; F:	
Split pictures include flow charts, line graphs, histogram	ms, and
28 graphs including text. Unsplit pictures include meta-	-analysis
diagrams, PCR amplification curves, and survival curves.	
The author(s) highlighted the changes made to the ma	nuscript
according to the peer-reviewers' comments.	[ Y]
The responses to the peer-reviewers' comments are consist	ent with
30 the changes made to the manuscript.	[ Y]
The revised manuscript is provided (file name: Ma	nuscript
NoReview; <i>e.g.</i> , 870- Review).	
The letter of peer-reviewers' comments is provided (file	e name:
31 Manuscript NoPeer-review(s); <i>e.g.</i> , 870-Peer-review(s)).	[Y]
The response letter is provided (file name: Ma	nuscript
NoAnswering reviewers; e.g., 870-Answering reviewers).	
The related ethics and relevant documents are provided, su	ch as (1)
32 Approved grant application form(s) or funding agency cop	y of any [Y]
approval document(s) (file name: Manuscript NoGrant app	plication

	form(s)); (2) Biostatistics review certificate (file name: Manuscript	
	NoBiostatistics statement); (3) Conflict-of-interest statement (file	
	name: Manuscript NoConflict-of-interest statement); (4) Clinical	
	trial registration statement (file name: Manuscript NoClinical trial	
	registration statement); (5) Institutional review board approval form	
	or document (file name: Manuscript NoInstitutional review board	
	statement); (6) Institutional animal care and use committee	
	approval form or document (file name: Manuscript	
	NoInstitutional animal care and use committee statement), and (7)	
	Signed informed consent form(s) or document(s) (file name:	
	Manuscript NoInformed consent statement).	
	All authors signed the BPG Copyright license agreement form (file	
33	name: Manuscript NoCopyright license agreement; e.g.,	[Y]
	870-Copyright license agreement).	
	The language certificate provided by authors who are non-native	
34	speakers of English meets the BPG requirements (file name:	[Y]
	Manuscript NoLanguage certificate; <i>e.g.</i> , 870-Language certificate).	
	The photos licensed in the Agreement for Use of Personal Photos	
25	are consistent with those in the paper (file name: Manuscript	INT 1
35	NoAgreement for use of personal photos; e.g., 870-Agreement for	[N]
	use of personal photos).	
	This document (Checklist of Responsibilities for Scientific Editors)	
36	has been saved under the file name: manuscript NoScientific	[ Y]
	editor work list (e.g., 870-Scientific editor work list).	
37	A CrossCheck investigation (an effective tool for detecting unoriginal	
	content, enabling our editors to preserve the journal's integrity and	
	the authors' copyright) has been performed for the manuscript via	
	the website: http://www.ithenticate.com/. The results document	[ Y]
	contains the following information for the manuscript: "Name of	
	journal", "Manuscript No.", "Columns", "Title" and "Author list".	
	•	

	The Figure of the CrossCheck results is saved in JPEG format (.jpg) at		
	1440 × 680 pixel resolution. The PDF of the CrossCheck results has		
	been saved under the file name: manuscript No CrossCheck report		
	(e.g., 870-CrossCheck report). The Google searches have also been		
	performed to further ensure publication of original content.		
20	The text of the manuscript is typed in Book Antiqua font, 12 pt, with		
38	1.5 line spacing.	[Y]	
	The primary responsibilities of our scientific editors include carefull	y checking the	
Responsibilities	entire manuscript and all accompanying materials for: (1) error	rs in spelling,	
of scientific	grammar, punctuation and wording; (2) suitability of tables, figures, f	igure data and	
	legends; (3) accurate and appropriate presentation of symbols (e.g. +,	-, ×, ÷, %, *) in	
editors	tables and figures; and (4) complete and comprehensive revision of t	the manuscript	
	according to the reviewers' comments.		
	Manuscript reception and registration→Initial review by scientific	c editor→Peer
