2	Science Editor: 1 Scientific quality: The manuscript describes a	
	retrospective study of the value of the endoscopy-based Kyoto	[Y]
	classification of gastritis in predicting submucosal invasion. The	
	topic is within the scope of the WJG. (1) Classification: Grade B,	

Telephone: +1-925-399-1568 E-mail: bpgoffice@wjgnet.com

	Grade C and Grade E; (2) Summary of the Peer-Review Report: This	
	article reporting that submucosal invasion of gastric cancer could be	
	predicted by endoscopic observation of background gastritis is	
	unlikely of interest to World J Gastroenterology readers.	
	Furthermore, a small patient number from a single institution was	
	included and this study could only demonstrate the correlation	
	rather than predicting value. (3) Format: There are 2 tables and 3	
	figures; (4) References: A total of 42 references are cited, including	
	22 references published in the last 3 years; (5) Self-cited references:	
	There are 2 self-cited references. 2 Language evaluation:	
	Classification: Grade A, Grade A and Grade C. A language editing	
	certificate issued by Editage was provided. 3 Academic norms and	
	rules: The authors provided the Biostatistics Review Certificate and	
	the Institutional Review Board Approval Form. Written informed	
	consent was waived. No academic misconduct was found by the	
	Google search. 4 Supplementary comments: This is an unsolicited	
	manuscript. No financial support was obtained for the study. 5	
	Issues raised: Please revise the description of manuscript type	
	(Observation Study has been chosen while submitted) 6 Re-Review:	
	Not required. 7 Recommendation: Rejection	
	Company Editor-in-Chief: I recommend the manuscript to be	
	published in the World Journal of Gastrointestinal Endoscopy.

15	The 'INTRODUCTION' section clearly describes the relevant background information for the study. Only the most relevant and current (within the past 5 years) literature is cited, with the exception of rare instances of seminal literature citations. All technical terms and/or abbreviations are explained and/or defined, with the full name of abbreviations given upon first appearance in the text and the abbreviation presented in parentheses [i.e., "computed tomography (CT)"]. First-person pronouns (e.g., 'T, 'we') are used appropriately to clearly indicate the work performed by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the	[Y]
	current study, the information is presented carefully.	
16	The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.	[Y]
17	The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure (<i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.	[Y]
18	Statistical symbols are accurate. Statistical significance is expressed as ${}^{\rm a}P$ < 0.05, ${}^{\rm b}P$ < 0.01 (P > 0.05 usually does not need to be denoted). If there are other series of P values, ${}^{\rm c}P$ < 0.05 and ${}^{\rm d}P$ < 0.01 are used,	[Y]

and a third series of P values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01.

Statistical data is expressed as mean \pm SD or mean \pm SE.

The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings. The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (i.e., providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (i.e., useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work. The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format. The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text, a superscript number should be placed following the name (i.e., "Pang et al"). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Mal" reported", "Pan et al" No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text (e.g., Pan et al" Pal, please see reference [8]).

Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version. The number of cited references is appropriate for the article type, as follows: Commentary: no less than 50; Review: no less than 50; Review: no less than 30/26; Case Report and Letter to the Editor; no less than 1. The ethics-related statements are provided in accordance with the manuscript type (e.g., Manuscript NoInstitutional review board statement, Manuscript NoAnimal care and use statement, etc.). The names of the peer reviewers and the scientific editor are present at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL).
