	General Information of the Manuscript	
	Name of journal: World Journal of Hepatology	
	Manuscript NO.: 69318	
	Column: Prospective Study	
	Title: Non-alcoholic steatohepatitis in liver transplant recipients	
	diagnosed by serum cytokeratin 18 and transient elastography: A	
1	prospective study	[Y]
	Authors: Alshaima Alhinai, Afsheen Qayyum-Khan, Xun Zhang,	
	Patrick Samaha, Peter Metrakos, Marc Deschenes, Philip Wong,	
	Peter Ghali, Tian-Yan Chen and Giada Sebastiani	
	Reviewer code: 02441106, 05122735, and 05038583	
	First decision: 2021-07-13 23:45	
	Scientific Editor: Jing-Jie Wang (Online Science Editor)	

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	Date of signature: 11/9/2021 (month/day/year)	
	Editorial Office's Comments	
	Science Editor: 1 Scientific quality: The manuscript has a title:	
	"Non-alcoholic steatohepatitis in liver transplant recipients	
	diagnosed by serum cytokeratin 18 and transient elastography: a	
	prospective study". The topic is within the scope of the World	
	Journal of Gastroenterology. (1) Classification: Grade E (Do not	
	publish) and B (Very Good); (2) Summary of the Peer-Review	
	Report: This is the first cohort study using cytokeratin 18 in	
	association with transient elastography with controlled association	
	parameter to investigate NAFLD and NASH in liver transplant	
	recipients. NAFLD and NASH diagnosed by non-invasive tests	[]/[]
2	occur frequently in the first 18 months from liver transplant.	
2	Overweight is the main risk factor. Non-invasive liver fibrosis	[Y]
	markers have suboptimal accuracy. (3) Format: There is 3 tables and	
	4 figures; (4) References: There are 47 references; (5) Self-cited	
	references:; (6) References recommendations: The authors have the	
	right to refuse to cite improper references recommended by the peer	
	reviewer(s), especially those published by the peer 5 / 6 reviewer(s)	
	him/herself (themselves). If the authors find the peer reviewer(s)	
	request for the authors to cite improper references published by	
	him/herself (themselves), please send the peer reviewer's ID	
	number to editorialoffice@wjgnet.com. The Editorial Office will	
	close and remove the peer reviewer from the F6Publishing system	
	immediately. 2 Language evaluation: Classification: Grade A and	

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	A. 3 Academic norms and rules: 4 Supplementary comments: This	
	is an unsolicited Manuscript. 5 Issues raised: The "Article	
	Highlights" section is missing. Please add the "Article Highlights"	
	section at the end of the main text; 6 Re-Review: Required. 7	
	Recommendation: Major revision.	
	Company Editor-in-Chief: I recommend the manuscript to be	
	published in the World Journal of Hepatology.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	
	not too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided.	[Y]
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first	
6	names are listed on the title page and are consistent with those	[Y]
	listed in the signed BPG Copyright License Agreement form.	
	The 'Author contributions' passage describes the specific	
	contribution(s) made by each author. The author's names are listed	
	in the following format: full family (sur)name followed by	
	abbreviated first and middles names.	
	e.g., "Wang CL and Liang L contributed equally to this work; Wang	
7	CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	[Y]
	research study; Wang CL, Zou CC, Hong F and Wu XM performed	
	the research; Xue JZ and Lu JR contributed new reagents and	
	analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and	
	Wang CL, Liang L and Fu JF wrote the manuscript. All authors	
	have read and approve the final manuscript."	
	analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript. All authors	

8	The 'Supported by' statement describes the source(s) of financial	
	support and includes the corresponding identification number(s)	[Y]
	and program ID(s) if available, and contains no spelling errors.	
	The 'Corresponding author' passage provides the corresponding	
	author's full first and family (sur)names, abbreviated title (e.g., MD,	
9	PhD), affiliated institute's name and complete postal address	[Y]
	(including zip code) and e-mail (written in all lowercase), and	
	contains no spelling errors.	
	The Manuscript Tracking information (i.e., Received, Peer review	
10	started, First decision, Revised, Accepted, Article in press, and	F2/1
10	Published online) are provided along with the corresponding editor	[Y]
	and date for each item, and contain no spelling errors.	
	The Abstract section is formatted according to the article-specific	
	style (structured vs unstructured) and word count thresholds, as	
	follows:	
	Commentary, Frontier, Diagnostic Advances, Medical Ethics,	
	Minireview, Review, Therapeutics Advances, and Topic Highlight:	
44	Non-structured abstract that is no less than 200 words.	
11	Field of Vision, Case Report and Letter to the Editor:	[Y]
	Non-structured abstract that is no less than 150 words.	
	Research articles: Structured abstract with subsections for AIM (no	
	more than 20 words); METHODS (no less than 80 words); RESULTS	
	(no less than 120 words); and CONCLUSION (no more than 26	
	words).	
12	The 'Key words' list provides 5-10 keywords that reflect the main	
	content of the study. The first letter of each keyword is capitalized,	[Y]
	and each keyword is separated by a semicolon.	
13	The "citation" contains authors' names and manuscript title. The	
	name of the first author should be typed in bold letters; the family	[Y]
	(sur) name of all authors should be typed with the first letter	

	capitalized, followed by their abbreviated first and middle initials.	
	For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick	
	Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,	
	Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes	
	mellitus increases the risk of gastric cancer: A meta-analysis. World J	
	Gastroenterol 2019; In press	
	The 'Core tip' provides a summary (less than 100 words) of the	
4.4	study that outlines the most innovative and important arguments	F247
14	and core contents of the paper and will serve to effectively attract	[Y]
	readers.	
	The 'INTRODUCTION' section clearly describes the relevant	
	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or defined,	
	with the full name of abbreviations given upon first appearance in	
15	the text and the abbreviation presented in parentheses [i.e.,	[Y]
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed	
	by the author(s). When weaknesses of previous studies are	
	described in the text to highlight the innovations related to the	
	current study, the information is presented carefully.	
	The 'MATERIALS AND METHODS' section clearly and accurately	
16	describes all materials and methods used to obtain the data	
	presented in the article and is adequate for a reader to repeat the	[Y]
	study.	
	1 '	

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

17	The 'RESULTS' section concisely describes the observational and	
	experimental results. Representative data and data that have	
	scientific significance are emphasized. Data is presented in either	
	the text, a table or figure (i.e., chart, diagram, graph or image), but is	[Y]
	not repeated among each. Information presented in the tables and	
	figures clearly describes the trends, meaning, and inferences.	
	Results described in textual form are accurate, concise and clear.	
	Statistical symbols are accurate. Statistical significance is expressed	
	as ${}^{a}P$ < 0.05, ${}^{b}P$ < 0.01 (P > 0.05 usually does not need to be denoted).	
18	If there are other series of <i>P</i> values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,	[Y]
	and a third series of <i>P</i> values is expressed as $^{e}P < 0.05$ and $^{f}P < 0.01$.	
	Statistical data is expressed as mean \pm SD or mean \pm SE.	
	The 'DISCUSSION' section (1) describes the main purpose and	
	hypothesis of the study; (2) summarizes the most important results;	
	(3) illustrates and explains the results (but does not simply repeat	
10	the data) and draws conclusions or inferences based on the results;	[Y]
19	(4) points out the limitations of the study and their impact on the	
	results, as well as proposes further advice on future research	
	topic(s) or direction(s); and (5) describes the theoretical significance	
	and practical value of the findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	
20	individuals or organizations for technical support (i.e., providing	
	instrumentation, equipment or experimental materials, and/or	[Y]
	assistance in experimental work), non-technical services (i.e., useful	
	inspiration, suggestions, guidance, or review), and/or any other	
	auxiliary work.	
21	The 'ARTICLE HIGHLIGHTS' section provides comments for	[3/]
	original articles in accordance with the specified format.	[Y]

	The 'REFERENCES' section lists the references in the Vancouver	
	style. This style uses Arabic numeral in-text citations based on the	
	order of the first appearance of a source in the text. For citations	
	where the author's name is indicated in the text, a superscript	1
	number should be placed following the name (i.e., "Pang et al"). For	
	citations where no author is indicated, a superscript number should	
22	be placed at the end of the sentence. Respective examples are: "Ma ^[1]	[Y]
	reported", "Pan et al ^[2-5] indicated"; "PCR has a high	
	sensitivity ^[6,9] ." No superscript numbers are used when the	
	reference number is described in the text; for example, "The	
	experimental method used has been described in reference [8]." The	
	style of reference citations in tables is the same as that in the text	
	(e.g., Pan et $al^{[2-5]}$, please see reference [8]).	
	Journal references have been verified to ensure that there are no	
	duplicate references and that the PMID numbers are correct. For	
	references not yet included in PubMed: the name of Chinese	
22	journals is spelled out using Chinese Pinyin, with the first letter of	[Y]
23	each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of	
	journals in other languages are listed according to indexing	
	information retrieved from Google. Book references are presented	
	with all the information relevant to the electronic version.	
	The number of cited references is appropriate for the article type, as	
	follows:	[Y]
24	Commentary: no less than 50;	
24	Review: no less than 100;	
	Article: no less than 30/26;	
	Case Report and Letter to the Editor: no less than 1.	
25	The ethics-related statements are provided in accordance with the	
	manuscript type (e.g., Manuscript NoInstitutional review board	[Y]
	statement, Manuscript NoAnimal care and use statement, etc.).	

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

The names of the peer reviewers and the scientific editor are present at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL). The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, ×, *, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs that depicts data of the same theme. For example: Figure 1 Pathological changes in atrophic gastritis tissue before and after treatment. A:; B:; C:; D:; E:; F: Split pictures include flow charts, line graphs, histograms, and graphs including text. Unsplit pictures include meta-analysis diagrams, PCR amplification curves, and survival curves. The author(s) highlighted the changes made to the manuscript according to the peer-reviewers' comments are consistent with the changes made to the manuscript. The responses to the peer-reviewers' comments are consistent with the changes made to the manuscript. The revised manuscript is provided (file name: Manuscript NoReview; e.g., 870-Review). The letter of peer-reviewers' comments is provided (file name: Manuscript NoAnswering reviewers; e.g., 870-Answering reviewers). The related ethics and relevant documents are provided, such as (1) Approved grant application form(s) or funding agency copy of any approval document(s) (file name: Manuscript NoGrant application form(s)); (2) Biostatistics review certificate (file name: Manuscript NoBiostatistics statement); (3) Conflict-of-interest statement); (4) Clinical mane: Manuscript NoBiostatistics statement); (3) Conflict-of-interest statement); (4) Clinical mane: Manuscript NoBiostatistics review certificate (file name: Manuscript (4) Clinical mane: Manuscript NoBiostatistics review certificate (file name: Manuscript NoBiostatistics review certificate (file name: Manuscript NoBiostatistics review certifica

	NoInstitutional animal care and use committee statement), and (7)	
	Signed informed consent form(s) or document(s) (file name:	
	Manuscript NoInformed consent statement).	
	All authors signed the BPG Copyright license agreement form (file	
33	name: Manuscript NoCopyright license agreement; e.g.,	[Y]
	870-Copyright license agreement).	
	The language certificate provided by authors who are non-native	
34	speakers of English meets the BPG requirements (file name:	[N]
	Manuscript NoLanguage certificate; e.g., 870-Language certificate).	
	The photos licensed in the Agreement for Use of Personal Photos	
25	are consistent with those in the paper (file name: Manuscript	ENTI
35	NoAgreement for use of personal photos; e.g., 870-Agreement for	[N]
	use of personal photos).	
	This document (Checklist of Responsibilities for Scientific Editors)	
36	has been saved under the file name: manuscript NoScientific	[Y]
	editor work list (e.g., 870-Scientific editor work list).	
	A CrossCheck investigation (an effective tool for detecting unoriginal	
	content, enabling our editors to preserve the journal's integrity and	
	the authors' copyright) has been performed for the manuscript via	
	the website: http://www.ithenticate.com/. The results document	
37	contains the following information for the manuscript: "Name of	[Y]
	journal", "Manuscript No.", "Columns", "Title" and "Author list".	
	The Figure of the <i>CrossCheck</i> results is saved in JPEG format (.jpg) at	
	1440×680 pixel resolution. The PDF of the <i>CrossCheck</i> results has	
	been saved under the file name: manuscript No CrossCheck report	

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	(e.g., 870-CrossCheck report). The Google searches have also been		
	performed to further ensure publication of original content.		
20	The text of the manuscript is typed in Book Antiqua font, 12 pt, with	F2/7	
38	1.5 line spacing.	[Y]	
	The primary responsibilities of our scientific editors include carefully	y checking the	
Dagaga and Hilling	entire manuscript and all accompanying materials for: (1) error	rs in spelling,	
Responsibilities	grammar, punctuation and wording; (2) suitability of tables, figures, f	igure data and	
of scientific	legends; (3) accurate and appropriate presentation of symbols (e.g. +,	-, ×, ÷, %, *) in	
editors	tables and figures; and (4) complete and comprehensive revision of t	he manuscript	
	according to the reviewers' comments.		
	Manuscript reception and registration→Initial review by scientific editor→Peer		
	review→End of peer review→First round of meeting evalu	ation→To be	
	accepted→Revision by the author(s)→Second round of meeting eval	uation→To be	
	accepted/revised/rejected→Final review by the Editor-in-Chief	(final quality	
Publication	control for academic content and language quality)→Final acceptance	e and charging	
process	of publication fee→Language editing→Production→Proofreading by scientific		
	editor→Proofreading by deputy editor→Final review by Editor-in-C	Chief→Release	
	of online open-access papers in electronic form on the BPG websi	te→Release of	
	online papers on PubMed Central→Delivery of high-quality PDF 1	reprints to the	
	author(s)→End of the publication process.
