follows: Manuscript No.: 66780 Journal: World Journal of Clinical Oncology Title: Neurotrophic Receptor Tyrosine Kinase (NTRK) family members in secretory and non-secretory breast carcinomas Manuscript Type: Clinical and Translational Research 1 Scientific quality:The manuscript aims to analyze the role of lesions in Neurotrophic Receptor Tyrosine Kinase genes in breast cancers. The topic is within the scope of the WJG. (1) Classification: Grade B; (2) Summary of the Peer-Review Report: The choice of topic is very attractive for reader, and can reflect the content of the article. The key words reflect the focus of the manuscript. The manuscript adequately describe the background, present status and significance of the study (3) Format: There are 0 table and 5 figure; References: A total of 60 references are cited, including 26 references published in the last 3 years; (5) Self-cited references: There is no self-cited references; (6) References recommendations: The authors have the right to refuse to cite improper references recommended by the peer reviewer(s), especially those published by the peer reviewer(s) him/herself (themselves). If the authors find the peer reviewer(s) request for the authors to cite improper references published by him/herself (themselves), please send the peer reviewer's ID number to editorial office@wjgnet.com. The Editorial Office will close and remove the peer reviewer from the F6Publishing system immediately. 2 Language evaluation: Classification: Grade B 3 Academic norms and rules: The authors provided the Biostatistics Review Certificate, the signed

	Authors.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	
	not too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided.	[Y]
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]

	The authors' full family (sur)names and full/abbreviated first	
6	names are listed on the title page and are consistent with those	[Y]
	listed in the signed BPG Copyright License Agreement form.	
	The 'Author contributions' passage describes the specific	
	contribution(s) made by each author. The author's names are listed	
	in the following format: full family (sur)name followed by	
	abbreviated first and middles names.	
	e.g., "Wang CL and Liang L contributed equally to this work; Wang

	The 'INTRODUCTION' section clearly describes the relevant		
	background information for the study. Only the most relevant and		
	current (within the past 5 years) literature is cited, with the		
	exception of rare instances of seminal literature citations. All		
	technical terms and/or abbreviations are explained and/or defined,		
15	with the full name of abbreviations given upon first appearance in	F 3/ 1	
15	the text and the abbreviation presented in parentheses [i.e.,	[Y]	
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',		
	'we') are used appropriately to clearly indicate the work performed		
	by the author(s). When weaknesses of previous studies are		
	described in the text to highlight the innovations related to the		
	current study, the information is presented carefully.		
	The 'MATERIALS AND METHODS' section clearly and accurately		
	describes all materials and methods used to obtain the data	[Y]	
16	presented in the article and is adequate for a reader to repeat the		
	study.		
	The 'RESULTS' section concisely describes the observational and		
	experimental results. Representative data and data that have		
	scientific significance are emphasized. Data is presented in either		
17	the text, a table or figure (i.e., chart, diagram, graph or image), but is	[Y]	
	not repeated among each. Information presented in the tables and		
	figures clearly describes the trends, meaning, and inferences.		
	Results described in textual form are accurate, concise and clear.		
	Statistical symbols are accurate. Statistical significance is expressed		
	as ${}^{a}P$ < 0.05, ${}^{b}P$ < 0.01 ( $P$ > 0.05 usually does not need to be denoted).		
18	If there are other series of $P$ values, $^cP$ < 0.05 and $^dP$ < 0.01 are used,	[Y]	
	and a third series of $P$ values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01.		
	Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.

The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.  The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (i.e., providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (i.e., useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.  The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.  The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text, For citations where the author's name is indicated in the text, a superscript number should be placed following the name (i.e.,, "Pang et al"). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Mal" reported", "Pan et all <sup>[2,8]</sup> indicated"; "PCR has a high sensitivity[s]." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text (e.g., Pan et all <sup>[2,8]</sup> , please see reference [8]).
