Direktor Klinik für Psychiatrie, Psychotherapie und  
Psychosomatik:  
Prof. Dr. med. Erich Seifritz

Zürich, 27.6.2016

**Infectious, atopic and inflammatory diseases, childhood adversities and familial aggregation are independently associated with the risk for mental disorders: results from a large Swiss epidemiological study (ID 00702098)**

**Grant application:**

The PsyCoLaus study was and is supported by research grants from GlaxoSmithKline, the Faculty of Biology and Medicine of Lausanne, and the Swiss National Science Foundation, No. 3200B0-105993, 3200B0-118308, 33CSCO-122661, 33CS30-139468 and 33CS30-148401.
