COMMENTS TO AUTHORS

This manuscript has clinical significance in terms of the treatment of diabetic patients with depression. However, we believe that it could benefit from some minor revisions. 1. In the discussion part, the author should consider elaborating more on how fluoxetine improves insulin sensitivity. 2. There are quite a few grammar and punctuation errors throughout the manuscript, e.g. page 2 line 20 change "on" to "of" and "is" to "are"etc.
