COMMENTS TO AUTHORS
Well written manuscript, Authors have mentioned Complications due to ingested bone fragments are not common and preoperative diagnosis remains a challenge therefore it must be considered in susceptable cases.In the case one it was the diagnostic challenge as it was not diagnosed preoperatively on noninvasive diagnostic modes,but they should include the USG,CT Scan,X ray findings with photos in first case and they have mentioned all reports were normal.

COMMENTS TO AUTHORS
Dear Authors, This is an interesting presentation of 2 cases with complicated FB ingestion. Well done for the nice images and the detailed discussion. It would be useful to condense your discussion -consider a table- and review/accept the proposed changes. Kind regards

COMMENTS TO AUTHORS

This is a manuscript of two-case report on IFB management, it is straightforward, and this reviewer has several comments/questions as follows: 1. Was the study approved by a relevant Ethic Committee or Institutional Review Board? 2. Introduction Section, 2nd Paragraph: A sentence or two is needed to indicate the importance or impact of the study either before or after this paragraph starting with "In this report,". 3. Discussion Section, 2nd Paragraph: A citation is needed for information from the American Society for GI Endoscopy. 4. Discussion Section, 3rd Paragraph: You reported the diameter of the bone fragments (2X3 cm) for both cases was the same. Is it coincidental? 5. Discussion Section, 5th Paragraph: Consider change the 2nd part of the sentences into 'frequent constipation was reported by both patients.' 6. Several places need punctuation corrections: a. Page 2, 4th line from bottom: Add a ',' before 'and'; b. Page 3, 4th line from the bottom: Remove '.' Before '(4). c. Page 4, 2nd paragraph 1st sentence: Change all the '.' To ',' before the numberings. d. Page 6, 1st line: Add a '.' Before 'Although….'.

COMMENTS TO AUTHORS
This is an interesting case reports with detail discussion of the management of this rare complication.
Comments: The discussion is too long and may condense to 3 pages.
