SPECIFIC COMMENTS TO AUTHORS

Dear authors, I have a few comments on your manuscript: - You mention only pharmacotherapy as the only way of treatment. Was is not possible to treat the patient using psychotherapy, especially in her pregnancy when medication can damage the fetus? - I found several mistakes in English, you should improve the text from the language point of view. - I appreciate that you point out that mental disorders are a continuous spectrum, not clearly separated nosological entities. Best regards The reviewer
