SPECIFIC COMMENTS TO AUTHORS

the author showed a patient with anti-GBM disease coexisting with IgA nephropathy. However, there were more than 10 cases of concurrent anti-GBM nephritis and IgA nephropathy in previous published articles. This is not the very first one. I think the authors should analyze the clinical differences and outcomes of these patients including the patient presented here. In this way, the readers could get more information.

SPECIFIC COMMENTS TO AUTHORS

Subtitles such as Chief complaints, History of the present illness etc are not required.
Correct p.3, line 18 "lambada". The prognosis of the combined anti-GBM and anti-IgA diseases, as highlighted in the text, is of interest.
