### **SPECIFIC COMMENTS TO AUTHORS**

Glomangiomas: case report with immunohistochemical study and literature review  
The article describes a case with many nodular masses in the soft tissues of the right foot and calf, with a review of the Chinese and English-language literature. The title reflects the main subject of the manuscript and the abstract summarize the work described in the manuscript. The manuscript adequately describe the background of the subject and quality of case presentation is adequate. In resume, it is written concisely and coherently presented. The manuscript interpret the findings adequately and clearly and logically. The authors discuss the relevance to clinical practice sufficiently and illustrations and tables are illustrative. The manuscript cite appropriately references in the introduction and discussion sections. In resume, it is a well-written review, the authors clearly summarized the case, and the importance of discussing such a rare disease. The only suggestion is english polishing of the manuscript, mainly concordances.
