SPECIFIC COMMENTS TO AUTHORS

Dear Author: A) Figures 1,2,3,4,6 should be cut off and unnecessary information removed, and picture angles should be corrected. B) As a figure legend, information such as the location and shape of the lesion in relation to the examination images in Figures 1,2,3,4,6 should be shared. C) Figure 5 should not be used as a pathology report; instead, only images should be shared, with the report text serving as the figure legend.

SPECIFIC COMMENTS TO AUTHORS

- Comments: In page 3: the phrase "normal bilateral salpingo-oophorectomy" should be revised. What is the type of sedation given to the patient during Transvaginal ultrasound-guided tunnel puncture and multiple lauromacrogol injections?
- What is the number and where were the sites of lauromacrogol injections? And how many ml were injected in each site? This should be mentioned in details. Pictures are of poor quality. Any articles in literature describing the side effects of lauromacrogol especially if accidentally injected directly inside a vessel and distributed in the systemic circulation?
