#### **SPECIFIC COMMENTS TO AUTHORS**

Dear authors: I would like to congratulate you for the effort and the work done, I must also tell you that I was pleasantly surprised by the writing and elaboration of this clinical case, from my point of view it is very complete and I would only like you to add in the discussion section, a sub-section of limitations and strengths of your study. In addition, I think you could add some more references to your manuscript to give more weight to your research. Best regards

The language needs to be changed to alter the narrative Distinguishing this from CNS-TB is extremely important, and a list of similar cases should be highlighted Does IgG4 level rise in CNS-TB? A detailed explanation of evidence-based practice is required
