## **SPECIFIC COMMENTS TO AUTHORS**

Dear Authors, Thank you for your submitting your manuscript entitled, "Relapsed and refractory primary testicular diffuse large B lymphoma treated with CAR T combined with PD-1 inhibitor : A case report and review of the literature" in WJCC. The manuscript is well written and the topic is interesting and timely. However, several criticisms should be addressed as the followings. Major 1. Please search for previously reported cases to date, same or similar as your case, using the "MEDLINE", and add a new table that summarizes their clinical characteristics for each item. 2. In particular, the choice of therapeutic procedures and the course of treatment is interesting in this case, as CART combined with anti-PD1 antibody. Please add a discussion with the rationale for the choice of treatment in each situation and its adequacy, fully citing recently reported references on the treatment of CART with PD1-antibody. Minor 1. Please add a preoperative macroscopic photograph of the right testicular tumor and a postoperative macroscopic photograph of the resected specimen in this case. 2. There is no presentation of histopathological specimen of the tumor part. Please Add a weakly and a enlarged strongly enlarged pathological pictures with HE staining. Further, please add typical pathological pictures of histochemical examinations. Thanks. Best regerd.
