SPECIFIC COMMENTS TO AUTHORS

Dear Authors I am delighted with your efforts to report a rare case worth reporting to the literature both for rarity and the challenges in its appropriate diagnosis. I have a few concerns that needs to be rectified before suggesting your article for publication.

- 1.The history and the examination part can be combined with relevant positive findings as a single paragraph to make it more seamless to readers
- 2.Minor language errors needs rectification
- 3.Although the case reported didnt encounter any recurrence, kindly mention the natural history of the disease and the follow-up guidelines
