#### **SPECIFIC COMMENTS TO AUTHORS**

Dear authors, I liked this manuscript. The topic of the article is very relevant. The requirements for an Opinion Review are generally met. However, the requirements for the references (list all authors and include the PMID and DOI) are not complete.

#### **SPECIFIC COMMENTS TO AUTHORS**

The authors have focussed on the timing of intervention for infected necrotizing pancreatitis. They have highlighted the need for the current opinion review. They have included the relevant recent trials related to the management of infected necrotizing pancreatitis. While supporting the role of late intervention, authors can include the specific indications for early intervention in infected necrotizing pancreatitis and the preferred route in summary. Also, grammatical errors in the manuscript need to be corrected.
