## SPECIFIC COMMENTS TO AUTHORS

Firstly, thank you for opportunity to review very interested article. I don't feel qualified to judge about the English language and style due to not native language. 1. The title reflect the main subject about bacteremia and hepatic cyst infection, title was clear and easy to understand. 2. The abstract summarize and reflect the work described in the manuscript. 3. The key words reflect the focus of the manuscript. 4. The manuscript adequately describe the background, present status, and significance of the study. The authors explain about hepatic cysts. After that, history, physical exam and laboratory was described. 5. The manuscript interpret the findings adequately and appropriately, highlighting the key points concisely, clearly, and logically. 6. Tables and figures sufficient, good quality and appropriately illustrative of the paper contents. 7. The manuscript cite appropriately the latest, important, and authoritative references in the introduction and discussion sections. However, some of references were incorrect style for this journal.

#### **SPECIFIC COMMENTS TO AUTHORS**

Good case report. Is this an isolated condition or many cases are being reported in your centre?
