SPECIFIC COMMENTS TO AUTHORS

Thank you for addressing such a rare case of extra ovarian encircling tissues around the uterus. It's well written manuscript with an interesting photos. My question is Have you checked for any extra ovarian tissues in the abdomen because you can't explore the abdomen through a small pfannenstiel incision . Are you sure that you sent the biopsy from this band or you've include a part of the ovary.

SPECIFIC COMMENTS TO AUTHORS

The authors reported an interesting case of an ovarian anomaly that manifested as a rectangular ovarian tissue bridging the distance between the left and right ovaries. I have never seen something similar before, and the authors did a very good job of documenting this malformation with high-quality figures. The manuscript is well-written and the case is well-presented. However, I have some minor comments: 1) In the abstract (line 37): please write "ovarian anomalies" instead of "ovary anomalies". 2) In the core tip (line 59): please avoid the redundancy in the following phrase: "a rare case of a rare ovarian anomaly ". You can write " a case of a rare ovarian anomaly" instead. 3) In the introduction (line 71): I could not understand how congenital ovarian agenesis could result from torsion. I found the phrase misleading and unclear. Please revise the section about unilateral ovarian agenesis in the introduction. 4) In the treatment section (line 104): please provide additional details on the surgical resection of the extra ovarian tissue. What power did you use (bipolar cauterization, plasma energy, CO2 laser, cold scissors), and did you pay attention to avoid injuring the normal ovaries while resecting the additional ovarian band? 5) In the follow-up section (line 111): did you do a color Doppler sonography to assess the ovarian vascularization after the surgery? Did you measure the serum AMH level? 6) The written language requires revisions. It contains a lot of grammatical faults. I suggest having the manuscript revised by someone fluent in English or a native English speaker.
