## SPECIFIC COMMENTS TO AUTHORS

This manuscript, case report type, written by Dr Qialin Zhou, with the title of "Guillain-Barre syndrome and hemophagocytic syndrome heralding the diagnosis of diffuse large B cell lymphoma: a case report" describes a case of a patient with Diffuse large b-cell lymphoma, Guillain-Barre syndrome (adult), and Hemophagocytic lymphohistiocytosis (HLH). This case report is worth publishing, it is well written and easy to understand. 1) To improve the manuscript, I recommend to make a table describing the diagnostic criteria of the 3 conditions, and highlight the criteria present in this cases. 2) Is it possible to make differential diagnosis with other entities? 3) Was the EB virus responsible to triggering GBS? 4) Which was the cause of the HPS? 5) Could you please show histological images, and other images suchs as the PET-CT scan? 6) Could you please add the normal values of the different parameters, to remind potential readers of the normal values?
