SPECIFIC COMMENTS TO AUTHORS

I congratulate the authors for publishing such a rare case report. Following are the comments: 1. Why was gastroscopy performed initially when there were no symptoms? 2. Why was the patient not evaluated further by biopsy? 3. What evaluation was done to evaluate the metastatic disease? 4. Why will the oncological history of RCC be missed as said by the authors. It lies in the art of history taking. Any lesion in the body in a patient with history of malignancy should be evaluated for metastasis. 5. Figure 1 not required. 6. In the past history mention the treatment done for RCC also.
