#### **SPECIFIC COMMENTS TO AUTHORS**

The findings of this review are novel. This is a topic to which very little attention has been paid and I recommend this article for publication. The literature review was well done and the data adequately synthesized.

#### **SPECIFIC COMMENTS TO AUTHORS**

The article is about challenges faced by families of health care workers including nurses during the pandemic. This is a truth that all across the world the healthcare professionals (from bottom to top) worked tirelessly and their efforts must be appreciated. In my view, this is an appraisal or gratitude towards family members of the health professionals. So, title may be modified to give the letter more clarity. Rest of the contents are good.
