SPECIFIC COMMENTS TO AUTHORS

In this review article, the authors describe the role of invasive E. coli in IBD patients. The contents are exciting and well described; however, there are some concerns about this article. 1. Generally, it is necessary to preset article search methods, including inclusion and exclusion criteria, even in a narrative review article. 2. Please state primary and secondary outcomes clearly at the end of the introduction. 3. Please obtain the summary table of UC vs. CD for the role of invasive E. coli in IBD for understanding by general readers. 4. Further English editing is necessary to publish the article.
