## SPECIFIC COMMENTS TO AUTHORS

01 The acronyms “CE-CT” and “RFA” need to be defined in the abstract. 02 There are some sentences in the text without reference to a previous study (or studies) in order to give evidence to their statements. Without references, these statements would be mere assumptions or allegations made by the author. Therefore, each of the following sentences need at least one reference to back up their statement: “The therapeutic effects exerted by those palliative treatment methods present relevance to the induction of intralesional necrosis, cytolysis, as well as cell death ultimately which leads to tumor cytorreduction.” “Data in terms of the clinical application of radiofrequency and microwave ablation, irreversible electroporation, cryoablation, radiotherapy coupled with high-intensity focused ultrasound, these procedures are of relative safety oriented with (temporary) local tumor control of inoperable pancreatic cancer.” “It is commonly considered that recurrent pancreatic cancer is a systemic illness. Thereby, patients can be treated with palliative chemotherapy.” 03 What is the conclusion of your case report? What is the “take-away” message?
