SPECIFIC COMMENTS TO AUTHORS

This is an interesting case of minimal change disease caused by polycythemia vera. This case is very interesting and well described. The manuscript requires a minor revision. Some minor language polishing should be revised. And there are too many figures, please re-arrange the figure numbers, or reduce the images.

SPECIFIC COMMENTS TO AUTHORS

In this article, the authors reported a case of proteinuria and high red blood cell counts. This case is very rare. The authors described the case in detail. Based on this case, the authors stated that there may be a causal relationship between minimal change disease and polycythemia vera. Anyway, extensive epidemiological data will be helpful in the future. The manuscript is overall very well written. Some minor editing is required before final acceptance.
