SPECIFIC COMMENTS TO AUTHORS

In this study, the authors investigated the clinical effects of tri-tongue acupuncture combined with low-frequency electrical stimulation for treating dysarthria after stroke. The authors found that the low-frequency electrical stimulation in conjunction with triple tongue acupuncture has a good clinical effect on dysarthria after stroke. The design of the study is good, and the methods are described in detail. The diagnostic criteria are clear. I have no specific comments to the authors. Only some minor spelling mistakes should be corrected.
