### **SPECIFIC COMMENTS TO AUTHORS**

Cases that can occur in abdominal aortic surgery and iliac vessel replacements. Appropriate diagnostic measures can properly diagnose ureteral-iliac artery fistula. Good job.. 1. Please be consistent with the use of the word male or man in your manuscript. 2. How long did the author follow up on this patient? There is a different statement between Abstract and Outcome and follow-up 3. Is the final diagnosis sufficient by cystoscopy? Should ureteroscopy be performed to determine the cause of massive hematuria? 4. Please explain why the author performed endovascular stent implantation in this patient! What are the advantages of other surgical procedures? Please discuss in the discussion section 5. Please state the limitations of your case report. 6. Please provide detailed information for each figure! 7. Please make the conclusion subheadings brief and clear!
