-------------------------------------	---

SPECIFIC COMMENTS TO AUTHORS

This paper stands major revision from my point of view. Some of the few observations have been noted below. 1. Objectives were not clearly mentioned in the paper. 2. What is the logic behind data collection of two days only in the paper? 3. Consent from the patients must be included along with the manuscript as Annexure. Please do it immediately. 4. Literature survey papers should be included in a separate section. Each survey paper should include their limitation in a tabular form. 5. Where is the research gap analysis with numerical data? 6. No comparative study with earlier papers was given. Please mention in a different sub-section and justify with tabular format. 7. Sufficient number of mathematical tests were not carried out to prove the efficacy of the paper. 8. All the statistical results were explained in paragraphs. Represent all those results in graphical methods and tabular formats only. 9. Please improve the Result section with advanced statistical tests. 10. English is poor with plenty of mistakes. Correct those.

SPECIFIC COMMENTS TO AUTHORS

Minor revision is needed. Please do these immediately. Literature survey papers should be included in a separate section. Each survey paper should include their limitation in a tabular form. Where is the research gap analysis with numerical data? No comparative study with earlier papers was given. Please mention in a different sub-section and justify with tabular format.
