#### **SPECIFIC COMMENTS TO AUTHORS**

This case report is very interesting but there are still some minor problems to revise:

1.The corresponding pathological diagnosis and HE photograph should be added to Figures. 2.As we all know,the chemical composition of traditional Chinese medicine is very complex, the main composition of Guizhi Dahuang which play the treatment role should be discussed, polysaccharide, protein, amino acid or others? 3.The possible mechanism of Guizhi Dahuang in treating ulcerative colitis should be discussed in more detail. 4.The manuscript may cite more references in recent years.
