SPECIFIC COMMENTS TO AUTHORS

The article is within the scope of the journal, and the topic described is interesting. It is well written and easy to read. However, to be accepted, it must be improved in some aspects: a) The article must be structured. For example: introduction, state of the art, case description, discussion, and conclusions and future work. b) It is important to contextualize the proposed cases and compare them with other similar studies. c) It would be necessary to add a state of the art to find out what other studies have been carried out similar to the one proposed. d) A discussion section must be included where the results obtained are critically explained, compared with other studies and the limitations and advances of the study carried out are shown.

SPECIFIC COMMENTS TO AUTHORS

Excellent case series of a rare and interesting condition. I would only suggest an english review since i found some errors throughout the manuscript.

SPECIFIC COMMENTS TO AUTHORS

The research team conducted a report of three cases of tacrolimus-related HSOS after liver transplantation. I find the topic of this manuscript original and little investigated by the scientific literature up to now.
