SPECIFIC COMMENTS TO AUTHORS

Dear Authors, Thank you for conducting an interesting case report entitled "Intermittent short-term prone positioning for severe ARDS after extracorporeal circulation of aortic dissection: A case report and literature review" for possible publication in the esteemed journal "World Journal of Clinical Cases". The manuscript needs major revision because of the following comments: 1. Minor editing and language corrections are necessary. 2. Title: exceeds the upper limit (18 words). 3. Abstract: Few points need to be revised as I highlighted them in yellow color. 4. Keywords: You should add another keyword to be 6 in number as per journal style. 5. Introduction: a. You need to add similar cases to your case. b. This sentence "The patient's family gave written consent to publish this report and its relevant images and test results." needs to be moved to the case presentation section. Besides, there is a contradiction between what was written in this sentence and in the declaration section (Informed written consent was obtained from the patient for publication of this report and any accompanying images.) 6. Case presentation a. I think it is better to mention more about the follow-up period. b. Other notes should be revised as they appeared in the main file. 7. Discussion a. It is unacceptable to see the discussion in one paragraph. b. There is not enough literature review as the title said. 8. References: Should follow the journal style. 9. Some sentences need a reference. I highlighted them in yellow color in the main file. 10. Other minor comments should be corrected as I mentioned in the main manuscript file.

SPECIFIC COMMENTS TO AUTHORS

Dear authors, Thank you for revising the manuscript. I have only one comment, there is a discrepancy between the minimum oxygenation index of 53 in the abstract and 51 in the text. Please unify them.
