SPECIFIC COMMENTS TO AUTHORS

Thank you very much for submitting this particular case. A rarity of extreme importance to raise awareness. The paper is well written and images are accurate. Abbreviation section, at the end of the manuscript, obviously does not contains all the abbreviations that are embedded inside the manuscript. Since acronyms are numerous, please include them all to be helpful to the readers.

SPECIFIC COMMENTS TO AUTHORS

Thank you for submitting this rare case report. However, it seems like it is written from the chart. Please rephrase and summarize the case report. In addition, the abstract is short and not informative. There is no percent of previous reported cases. Thank you

SPECIFIC COMMENTS TO AUTHORS

The author reported a case of a SMARCA4-deficient undifferentiated tumor (SMARCA4-DUT) with characteristic clinical and histological features. Their findings of this case could serve as a resource for future studies. The subject of this manuscript is of value, but there are defects need to be modified. 1. Abstract section: The conclusion seems to have insufficient data support. It is suggested that the author should summarize and describe the data of clinical features, absence of epithelial differentiation, and a negative SMARCA4 expression very briefly in CASE SUMMARY section. 2. Imaging examinations section: Should the author add the chest radiograph. 3. Figure 1. Imaging results. (A-C) The computed tomography scan reveals a huge mass with necrosis involving the left upper and lower lung lobes with invasion of the pericardium..... Here (A-C) seems unnecessary. It is recommended to delete (A-C) here.
