SPECIFIC COMMENTS TO AUTHORS

Hi thank you for inviting me to review the case report. please write about the surgery techniques in more details. the discussion should be improved. Did EMG-NCV confirm carpal tunnel syndrome?

SPECIFIC COMMENTS TO AUTHORS

This is an interesting case of a patient with T2D and gout suffering from carpal tunnel syndrome. The authors demonstrated in detail how to diagnose and perform carpal tunnel release. Some recommendations: - It was better if the authors mentioned HbA1C result of the patient. - With the eroded tendons, what were the specific tendons? and what did you do to improve the tendons? - Some English typo needs to be revised
