SPECIFIC COMMENTS TO AUTHORS

The paper is well organised according to the peer-review checklist criteria but there are 2 major issues with it. First, it would be nice if EASI or BSA was known, before and after treatment, and added in table 1. Second, and most important, a native speaker/english expert should read and correct the paper. In it's current form, english language is unacceptable for a scientific article. There are various mistakes, spelling errors, grammatical articles missing, tenses not used correctly, some parts are written in past simple and some in present simple. There are also some mistakes that the authors should take care of. For example, in discussion dupilumab is spelled duprizumab, LA is sometimes spelled and some times abbreviated etc.

SPECIFIC COMMENTS TO AUTHORS

Dear authors, These are nice cases but have some concerns: 1 – Kindly please rephrase paragraphs which specified in the manuscript with red brackets. 2- Please denote all microphotographs for amyloid deposits and other special findings with arrows, circle, etc. 3 – Please provide the list of abbreviations used in the manuscript. 4 – If it is possible, please provide the photographs of each patient with equal scale, 5 – Required corrections are enclosed in the text and highlighted with red color 6 – Modifications that are needed to be accomplished by authors are highlighted with blue color. 7 - Please insert the "letters" into their relevant figures. 8 – Please specify the magnification power of each microphotograph. Note: Kindly please note that my comments and also personal conclusions and uptakes from the photographs and contents of your article all are incorporated into a PDF version of the manuscript. Sincerely yours

SPECIFIC COMMENTS TO AUTHORS

Please, fix the last spelling and syntax errors. E.G "treatment BY dupilumab" should be "treatment WITH duoilumab" In Abstract it is correctly written "Lichen amyloidosis is a chronic, severely pruritic skin disease" and then in Core Tip "LA is a chronic, severe pruritus skin disease" In case one last sentence is "The patient continues to receive dupilumab maintenance therapy by injection of 300 mg dupilumab every 4 wk." The second "dupilumab should be deleted. In Discussion "LA treatment is generally directed to relieve pruritus and inflammation, such as....acitretin, is generally directed to relieve pruritus and inflammation. Please delete the last "generally directed to relieve pruritus and inflammation" etc. Pages 5 and 6 are saying the same things, case 1 is presented 2 times. In page 9, case 4 is also presented again, after the text in page 8
