

## PEER-REVIEW REPORT

**Name of journal:** *World Journal of Clinical Cases*

**Manuscript NO:** 78994

**Title:** New clinical application of digital intraoral scanning technology in occlusal reconstruction: A case report

**Provenance and peer review:** Unsolicited Manuscript; Externally peer reviewed

**Peer-review model:** Single blind

**Reviewer's code:** 02908703

**Position:** Peer Reviewer

**Academic degree:** DDS, PhD

**Professional title:** Associate Professor

**Reviewer's Country/Territory:** Greece

**Author's Country/Territory:** China

**Manuscript submission date:** 2022-12-24

**Reviewer chosen by:** Geng-Long Liu

**Reviewer accepted review:** 2023-01-06 11:31

**Reviewer performed review:** 2023-01-09 19:28

**Review time:** 3 Days and 7 Hours

## SPECIFIC COMMENTS TO AUTHORS

This manuscript is well, concisely, and coherently organized and presented. The discussion is accurate and the findings are stated in a clear and definite manner. All figures and diagrams are sufficient, good quality and the legends are adequate and accurately reflective of the images. I believe that the conclusions from this research should be confirmed with more clinical cases.

#### SPECIFIC COMMENTS TO AUTHORS

The application of digital technology to the dental field is important. This is a good paper that shows the advances in technology that can now be applied to diagnostic imaging and technical aids, as well as to the estimation of occlusal alignment. It would be nice to add the author's opinion as to which of the areas discussed in this paper will be the most advanced when AI advances in the future.
