SPECIFIC COMMENTS TO AUTHORS

The title is informative and relevant. The references are relevant and recent. The cited sources are referenced correctly. Appropriate and key studies are included. The introduction reveals what is already known about this topic. The research question is clearly outlined. The case is well-described, the used methods methods for diagnosing and therapy are valid and reliable. The patient data is presented in an appropriate way. The illustrative materials are relevant and clearly presented. Data is discussed from different angles and placed into context without being overinterpreted. The conclusions are supported by references and own results. This paper added to what is already in the topic. The article is consistent within itself. Specific comments on weaknesses of the article and what could be improved: Major points - none Minor points

1. What would be your recommendations based on the case and the outcomes?
2. What else would you be performed if you have an option (instrumental, imaging)?

SPECIFIC COMMENTS TO AUTHORS

Dear Author(s), Although this article covers the previous literature in detail, it does not contribute any new information. For this reason, it would be appropriate to expand the literature review and reorganize it as a review of the literature. Sincerely yours
