PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Cases*

Manuscript NO: 85070

Title: Tuberculosis-induced aplastic crisis and atypical lymphocyte expansion in advanced myelodysplastic syndrome: A case report and review of literature

Provenance and peer review: Unsolicited manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 05476795

Position: Peer Reviewer

Academic degree: MD

Professional title: Doctor

Reviewer's Country/Territory: Indonesia

Author's Country/Territory: China

Manuscript submission date: 2023-04-10

Reviewer chosen by: AI Technique

Reviewer accepted review: 2023-04-11 16:12

Reviewer performed review: 2023-04-11 16:46

Review time: 1 Hour

SPECIFIC COMMENTS TO AUTHORS

Dear editor, I have completed the evaluation of the manuscript titled "Tuberculosis-induced aplastic crisis, leukemic cell regression and CD56+ atypical lymphocyte expansion in advanced myelodysplastic syndrome: A case report". The case presentation is well-written, with satisfying description and demonstrative figures and adequate discussion. Although it adds limited data to the current literature it deserves publication for educational purpose after minor revision. -Authors should also indicate their research in terms of MDS etiology (such as genetic abnormalities, viral studies...) -They should indicate which agents they use in the treatment of hypomethylation. -The intended use of cyclosporine should be clearly emphasized and cited. -Authors should also indicate their research in terms of MDS etiology (such as genetic abnormalities, viral studies...) -They should indicate which agents they use in the treatment of hypomethylation. -The intended use of cyclosporine should be clearly emphasized and cited.
