SPECIFIC COMMENTS TO AUTHORS

1. Authors have reported a rare case of concurrent triple-negative essential thrombocythemia and chest wall tuberculosis. They have to mention whether TB is endemic in the region where the case patient has been reported. If not whether any work up for immunodeficiency has been done. 2. Authors have to carefully proof read the manuscript as the discussion starts with "Thrombocytopenia occurs with elevated platelet count" which is a wrong statement

SPECIFIC COMMENTS TO AUTHORS

The manuscript has been peer-reviewed, and it's ready for the first decision. A novel case report but with predominance of histopathological aspects. Thrombocytopenia occurs with elevated platelet count in discussion needs to be thrombocythemia
