SPECIFIC COMMENTS TO AUTHORS

Well presented as a case report. The topic is well known in urological practice. Especially the details of the operation could have been given better. In this way, it becomes difficult to establish a cause-effect relationship. this makes the case report ordinary. Due to low priority not suitable for publication in this journal.

SPECIFIC COMMENTS TO AUTHORS

Dear Author, Congratulations and thanks for submitting the above-mentioned interesting article for publication to World Journal of Clinical Cases. I appreciate you and hope your case to be published. However, some revisions should be considered: 1.

It will be more interesting if you have done a literature review. 2. There are several grammatical and editing errors throughout the text. For example (Peniel, replantation....)

3. It is recommended to describe the experience of the surgeons. 4. Define some of the abbreviations, such as RUG 5. The resolution of the figures is not very optimal. A minimum resolution of 300 ppi is recommended. 6. You said that Figure 2 illustrates Color Doppler ultrasonography but really it illustrates operative steps.
