#### **SPECIFIC COMMENTS TO AUTHORS**

This is an interesting study of application of a hospital–community–family rehabilitation nursing model combined with motor imagery therapy in cerebral infarction patients. The study is well designed and the results are interesting. The manuscript requires a minor editing. Some minor language polishing should be corrected. The tables should be edited.

### **SPECIFIC COMMENTS TO AUTHORS**

In this study, the authors explored the application value of a combination of the hospital community family trinity rehabilitation nursing model and motor imagery therapy in patients with cerebral infarction, in terms of its effects on balance ability, motor ability, and quality of life of these patients. The study is well performed. The results are interesting and well discussed. The reviewer recommends to accept this study after a minor editing. Thank you.
