SPECIFIC COMMENTS TO AUTHORS

This research aimed to record the dispersion of crucial clinical bacteria within a hospital and the continuous monitoring of changes in the drug sensitivity of various multidrug-resistant strains. The study designed is well, methods are clearly described. The manuscript is well written. Comments: 1. The aim in the abstract is not clear, and too long. Please revise it. 2. The limit of the study should be discussed. 3. Tables and figures should be moved to end of the study.
