SPECIFIC COMMENTS TO AUTHORS

This study entitled “Infrequent organ involvement in immunoglobulin G4-related prostate disease: a case study” seems to have been generally well executed and written. Furthermore, I believe that this paper will be of great interest to the readers. However, I have some remarks that require authors attention. State his anamnesis in text. Did he have any chronic illness at the time of admission to the hospital, or any health issues in the past? I can not follow the dates so precise. Please be more precise about all significant dates. Did he have any controls in the last few years, when was the last visit of patient to your hospital?

SPECIFIC COMMENTS TO AUTHORS

It is a well-written and documented interesting case report of a rare autoimmune disease that was managed successfully. Please refer the range of normal values regarding the measured immunoglobulins (Ig).
