SPECIFIC COMMENTS TO AUTHORS

Manuscript needs some corrections and revision: -Platelet inhibition is not an appropriate term. Decrease in platelet counts is more suitable. -"Pezopanib" must be changed throughout the text as "pazopanib". -"Signs and symptoms related with bleeding diathesis should be mentioned in history of the patient. -I think "hemophilia syndrome" is only a possibility. Not an evidenced diagnosis. Which type was it? Any evidenced factor analysis should be mentioned. If not the authors should change the title and the text accordingly.
