SPECIFIC COMMENTS TO AUTHORS

Please emphasize that abstinence from drinking and smoking is important as a pain control measure for patients with chronic pancreatitis. In recent years, endoscopic ultrasound-guided pancreatic duct drainage has been performed for cases in which pancreatic duct drainage by ERCP is difficult. Please add this information. Adding diagrams for each treatment makes it easier for readers to understand.

SPECIFIC COMMENTS TO AUTHORS

First, the clear diagnostic definition of chronic pancreatitis should be added in this article. Second, please review literature and add a paragraph about the endoscopic procedure to relieve of main pancreatic duct with high pressure, such stent insertion.
