#### SPECIFIC COMMENTS TO AUTHORS

Very interesting and well-written case report. I only suggest a language revision, since

i found some minor english errors.

#### SPECIFIC COMMENTS TO AUTHORS

The manuscript entitled " Development of Henoch-Schoenlein purpura in a child with idiopathic hypereosinophilia syndrome with multiple thrombotic onset: a case report " reported a case of IHES with dyspnea and lower limb pain as the initial presentation and subsequent concomitant HSP. The paper is well structured, written English is generally good throughout the text. My comments are below: 1. Novelty: The contributions that the study has made for research progress in this field should be highlighted. 2. Abstract: "DISCUSSION" should be corrected to "CONCLUSION". 3. Introduction: I doubt this sentence "Children diagnosed as IHES with multiple embolisms complicated by HSP have not been reported at home or abroad". I found that Children diagnosed as IHES with multiple embolisms complicated by HSP has been reported previously. 4. Discussion: 4.1 Summarize the clinical data of patients with HES with thrombotic events into a table, including clinical manifestations, treatment, prognosis, etc 4.2 The prognosis of patients with HES with thrombotic events should be discussed. 4.3 Limitation of this study and future scope are missing. 5. Figure: 5.1 Please provide Color Doppler ultrasound, Fig 3 (A) is only two-dimensional ultrasound. 5.2 What the arrows refer to should be clarified in the illustration

## SPECIFIC COMMENTS TO AUTHORS

The manuscript entitled " Development of Henoch-Schoenlein purpura in a child with idiopathic hypereosinophilia syndrome with multiple thrombotic onset: a case report " reported a case of IHES with dyspnea and lower limb pain as the initial presentation and

subsequent concomitant HSP. The paper is well structured, written English is generally good throughout the text. The authors had well completed the revision. In my opinion, this paper is suitable to be published in World Journal of Clinical Cases.
