#### **SPECIFIC COMMENTS TO AUTHORS**

1.It is recommended to supplement the incidence of hemorrhagic CRP, combined with the incidence of giant ulcers。 2.Line 43 has a spelling problem "adnexectom." 3.It is recommended to add symptom improvement descriptions in CASE SUMMARY 4.Line 80 The authors believe that there are no relevant guidelines, but the reference is from 2016, which is not convincing. Please supplement the literature in recent years. 5.Line 85 Are these additional symptoms improved after treatment with Chinese medicine? Please supplement additional notes. 6.It is recommended that the presence or absence of other relevant western medicines, fungal supplements, and physical therapy be described here.
