**SPECIFIC COMMENTS TO AUTHORS**

1) Oncologists have seen a lot of descriptions of the side effects of immune checkpoint inhibitors, and it seems obvious. Dare to list the very recent new knowledge that you want to convey in this minireview that has not been found so far. If you don't have new knowledge, please add a new one. Also, add a new Table(s) that summarizes it. 2) The side effects of immune checkpoint inhibitors are wide-ranging. Add new schematic figures summarizing them in a way that WJCC readers can understand. 3) The summary is long, especially the second half is poor. It is a poor description that does not match the review of ordinary medical papers. Lastly, it says, "These points need special attention." Please list what "these points" are. Please revise it.
