SPECIFIC COMMENTS TO AUTHORS

I want to thank you for giving me the opportunity to review this manuscript. This case report aims to reflect the clinical course of the patient. I read the text of the article, but found no innovation in the results. I believe that this paper can not explain these findings better than previous studies. Therefore, I do agree with the importance of this topic, but I am not sure how your supplementary research will achieve this, because data already exists, and you have not made a significant contribution to adding more information to better manage this difficult situation. Through careful review of your articles and references, the Taiwan region mentioned in Table 1 of your article should be modified. This is not consistent with your country based statistical method, because Taiwan does not belong to a country.
